

Air 1 is the only radio station I listen to. The programming is wholesome and family-friendly. There is not another station in my listening area that plays this type of Christian rock/worship venue.

If Air 1 is discontinued, the effect for me and my family would be catastrophic. My husband listens to Air1 from his business office at home all day long, from 7:00am - 6:00pm and my kids listen to it always when traveling in the car. There is not another station, except the oldies, that I allow the kids to listen to. There is not another Christian station like Air1 or one they like better.

Air1 has a positive, encouraging and truthful message that is not heard anywhere else on the air waves in a format that appeals to younger audiences. The values are family-friendly. There is no objectionable language, rating would have to be a "G" if this were a movie format, and there are no sponsors or advertisements that interrupt the programming that are objectionable in topic or language either. I support Air1 100% and feel the message it brings is original and uplifting for all the areas it serves, which right now is FM 90.1, FM 89.5 and FM 100.7. Please do not let the LPFM stations have priority over my station's FM translator service. Please do not allow the proposed rule changes to give LPFM service priority over FM translator service.

Thanks for allowing a medium for us to voice our opinion.
